PROFESSIONAL SUMMARY

Highly motivated Full Stack Developer with 3+ years of professional experience specializing in modern web application development. Expert in building scalable, high-performance web applications using PHP, Laravel, React.js, and Next.js. Proven track record of delivering user-centric solutions with strong expertise in RESTful API development, database optimization, and DevOps practices. **Experienced in Agile development methodologies and cross-functional team collaboration.**

CORE COMPETENCIES

Programming Languages: PHP, JavaScript ES6+, Python, HTML5, CSS3, C, C++, Go
Frameworks & Libraries: Laravel, CodeIgniter, React.js, Next.js, Flask, TailwindCSS
Database Management: MySQL, PostgreSQL, MongoDB, Eloquent ORM, Database Design
Web Technologies: RESTful API Development, MVC Architecture, AJAX, JSON, XML
DevOps & Tools: Docker, Docker Compose, Git, GitHub, SSH, Tmux, Neovim
Cloud & Hosting: WHM, cPanel, DNS Configuration, SMTP Setup, Linux Server Administration
Payment Integration: Stripe API, Secure Payment Gateways, E-commerce Solutions
Methodologies: Agile Development, SDLC, Code Review, Test-Driven Development

PROFESSIONAL EXPERIENCE

- FULL STACK DEVELOPER | MAGAS**

February 2025 - Present

 - Developed and maintained comprehensive finance platform serving 500+ SMEs with classified listing functionality and payment gateway integration
 - Implemented admin verification workflows improving data integrity by 40% and ensuring user compliance
 - Designed intuitive user and admin dashboards resulting in 35% improvement in user engagement
 - Managed end-to-end Git version control for 5+ team members ensuring 99% deployment success rate
 - Administered WHM hosting environment including DNS configurations and email SMTP setup for 100+ clients
 - Optimized Laravel applications and MySQL databases achieving 25% performance improvement
- FULL STACK DEVELOPER | NOITAVONNE INDIA**

July 2022 - October 2024

 - Built and maintained 10+ scalable web applications using Laravel Framework and CodeIgniter serving 1000+ active users
 - Developed RESTful APIs with Laravel improving front-end and back-end integration efficiency by 30%
 - Implemented React.js and Next.js solutions enhancing user experience and reducing page load time by 40%
 - Utilized Docker containerization ensuring 99.9% deployment consistency across development and production environments
 - Led debugging and performance optimization efforts resolving 95% of critical application issues within SLA
 - Integrated Stripe payment gateway and treasury features processing \$50K+ monthly transactions securely
 - Gained expertise in networking and server infrastructure supporting stable operations for 24/7 applications
 - **Achievement: Awarded Employee of the Month (July 2023) for outstanding project development and team collaboration**

KEY PROJECTS

MAGAS.SERVICES - Financial & Classified Platform

Tech Stack: Laravel, MySQL, HTML5, CSS3, JavaScript

- Developed comprehensive financial platform for SMEs with advanced classified listing system
- Implemented secure admin verification workflows and payment processing capabilities
- Live Demo: [Try it here - magas.services]

WINDOWSHOPGOA.COM - Multi-Purpose Listing Platform

Tech Stack: Laravel, MySQL, JavaScript, Payment Integration

- Created versatile online platform enabling property, job, and classified product listings for Goa market
- Ensured robust backend architecture supporting diverse listing types and user interactions
- Live Demo: [Try it here - windowshopgoa.com]

SILOCLOUD.COM - Cloud Management Solutions

Tech Stack: CodeIgniter, Laravel, MySQL, Cloud Integration, Responsive UI

- Contributed to scalable cloud management application development
- Worked on both frontend and backend development handling key functionalities
- Live Demo: [Try it here - silocloud.com]

STORAGE.SILOCLOUD.IO - File Management System

Tech Stack: React.js, Laravel API, MySQL, File Handling, RESTful Services

- Developed user-friendly storage management system with interactive React.js frontend
- Built and integrated Laravel APIs for efficient file management operations
- Live Demo: [Try it here - storage.silocloud.io]

SILOTALK.COM - Video Communication Platform

Tech Stack: Next.js, Firebase, Docker, Jitsi Integration, WebRTC, Server-Side Rendering

- Built seamless chat and video calling platform using Next.js for SSR and client-side functionality
- Integrated self-hosted Jitsi video conferencing using Docker for scalable deployment
- Live Demo: [Try it here - silotalk.com]

LIBRIUM.TECH - Corporate Website

Tech Stack: HTML5, CSS3, JavaScript, Responsive Design, Performance Optimization

- Developed modern, visually appealing static website with optimized loading times
- Focused on clean, user-friendly responsive design and interactive elements
- Live Demo: [Try it here - librium.tech]

SOFT SKILLS

- **Team Leadership & Collaboration:** Experience leading development teams and cross-functional collaboration
- **Problem-Solving:** Strong analytical skills with ability to debug complex technical issues
- **Communication:** Excellent verbal and written communication skills in English, Hindi, and Marathi
- **Project Management:** Experience with Agile methodologies and project delivery within deadlines
- **Continuous Learning:** Passionate about staying updated with latest web development technologies

EDUCATION

Bachelor of Computer Science (BCS)

Shivaji University, Kolhapur | Currently Pursuing (External)

Relevant Coursework: Data Structures, Algorithms, Database Management, Software Engineering

LANGUAGES

- **English:** Professional Working Proficiency
- **Hindi:** Native Proficiency
- **Marathi:** Native Proficiency
