- **Databases:** MySQL, MongoDB
- **DevOps & Infrastructure:** Docker, Linux, SSH, Nginx, DigitalOcean, Git, GitHub
- **Hosting & Integrations:** cPanel, DNS configuration, SMTP setup, Stripe
- **AI Tools & Fundamentals:** Claude Code, AI-assisted development, prompt engineering, MCP fundamentals, and LLM concepts. Familiar with tokens and context windows.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Qbrain Solutions (Freelance)

October 2025 – Present

- Independently handle project development, technical implementation, deployment, and maintenance. I own each project from requirements through launch.
- Developed an advanced quiz application using React and Node.js. It includes administration and result-management functionality.
- Configured, deployed, and maintain an Envato-based Laravel task-management application on a DigitalOcean Droplet. Handled server and environment setup end to end.

Full Stack Developer | Confidential Client (Contract)

February 2025 – September 2025

- Developed and maintained Laravel applications and REST APIs. Integrated third-party services into existing systems.
- Worked across PHP, Laravel, MySQL, React, and JavaScript. Handled debugging, backend development, and deployment tasks.

Full Stack Developer | Noitavonne India (Full-time)

July 2022 – October 2024

- Built and maintained web applications using Laravel, React.js, and Next.js. Developed REST APIs and integrated them with frontend applications.
- Used Docker for consistent environments and supported code deployment. Managed Linux server administration and networking.
- Integrated Stripe payment and Treasury features with financial reporting. Received Employee of the Month recognition in July 2023 for outstanding project contribution.

KEY PROJECTS

CareerNav — Career Navigation Application

- Developed a career navigation platform that helps users identify their strengths and weaknesses. Users receive guidance to shape their career paths.
- Implemented advanced admin management and report generation features.
- Live Demo: test.careernav.in

Clearedup — Task Management Application

- Configured and deployed an Envato-based task management application to a DigitalOcean Droplet. Handled manual server, environment, and application setup.
- Live Demo: clearedup.in

Librium.tech — Corporate Crypto Website

- Developed a responsive cryptocurrency website with crypto wallet integration. Built a clean, interactive UI that works across devices.
- Live Demo: librium.tech

EDUCATION

Bachelor of Computer Science (BCS) Pursuing

Shivaji University, Kolhapur

ADDITIONAL

- **Languages:** English (Professional Working Proficiency), Hindi (Native), Marathi (Native).
- **Strengths:** Problem-solving, debugging, client communication, and project ownership.
